To Report Telephone Out of Order ..... Call Service Dept.
For Business Transactions ..... Call Business Office

ADRIAN M. NEWENS, Area Manager, Nebraska City, Nebraska
M. C. WALKER, District Manager, Lincoln, Nebraska

To Place a Long Distance Call

Tell the Long Distance Operator:

1. The city or town you want.
2. The out-of-town telephone number, if available, otherwise the name and address of the residence or business firm being called.
3. Your telephone number (and name if required) when requested by the operator.

When placing a station-to-station call, tell the operator you will talk with anyone who answers the telephone. If you wish to place a person-to-person call, simply give the operator the same information as above and the name of the particular person or department wanted.

Consult Your Directory

Keep your telephone directory handy and please use it . . . don't call or dial "Information" until you are satisfied the number you wish to call or dial is not listed in this directory.

Party Line Service

1. Please limit all conversation to five minutes, as long conversations prevent the use of the line by those who share the line with you and by those who may wish to call you.
2. Whenever a party line subscriber takes the receiver from the hook and finds the line in use, the receiver should be replaced at once in a careful manner.
3. You would help your neighbor in an emergency so please give up the line to him if he has to place an emergency call while you are talking.

Copyright 1954 by The Lincoln Telephone & Telegraph Company

DIALING SUGGESTIONS

Suppose you want to call John Jones—the directory tells you his number is 6457.

1. Lift receiver and be sure to wait for the dial tone—a steady "humming" sound.

2. Place finger in opening where you see the figure "6."

3. Pull dial around until your finger strikes the stop. Remove finger and let dial return freely.

4. Do the same with each of the other figures in order.

5. A "bur-r-ing" sound tells you the telephone is ringing. A "buzz-buzz" indicates the line is busy. If you hear the busy signal, or if you do not hear either sound, hang up, and after a reasonable wait, try the call again.

6. If you hear the ticking sound, a rapid and continuous series of "ticks", it means that the line is vacant. Replace your receiver for a moment to release the connection and then call "Information". When the operator answers give her the number you were trying to call. She will then instruct you regarding completion of your call.

HOOK LATCHES

Some telephones are equipped with hook latches, which limit the initial movement of the receiver hook. When the receiver is removed, the partial movement of the receiver hook permits you to listen and determine if the line is busy. The release of the hook latch permits the receiver hook to move to its full operating position, connecting the telephone for dialing as soon as the dial tone is heard.

When answering your telephone be sure to release the hook latch.

GENERAL INFORMATION

Regarding Service Furnished by The Lincoln Telephone & Telegraph Company

Use Of Equipment By Subscriber

Telephone service is for the exclusive use of the subscriber, members of his family, and/or his employees. The equipment shall not be removed from the subscriber's premises except by an authorized employee of the Company, and shall be surrendered to the Company upon the termination of the subscriber's contract.

Payment For Out-Of-Town Calls

The subscriber agrees to pay promptly for all toll line service furnished over the instrument leased under his contract regardless of whether such calls are placed with his knowledge and/or consent.

Foreign Equipment And Appliances

The equipment furnished by the Telephone Company shall be carefully used and no instrument or appliance, not authorized by The Lincoln Telephone & Telegraph Company, shall be attached to or in any way used in connection with such equipment. Telephone instruments have been designed to produce the best results and are necessarily sensitive and intricate. The various devices which are offered for sale, and which are supposed to improve transmission, eliminate noise, destroy germs, or afford other improvements, are not only unnecessary, but generally cause trouble. In order to protect its service the Telephone Company will remove all such appliances

Right Of Access To Premises

The agents of the Company shall have the right to enter the premises of the subscriber, at all reasonable hours, for the purpose of inspection, repair or removal of Company's equipment or wiring. The Company reserves the right to make observations of service rendered to the subscriber for the purpose of improving the service by detecting trouble or annoyances caused by the subscriber, or improper use of the service by the subscriber.

Allowance For Failure Of Service

The Company does not guarantee the uninterrupted working of the line or instrument. No reduction from the exchange service charge shall be made for interruptions unless the same have continued for more than forty-eight hours after notice is given of each interruption.

In case of widespread disaster, resulting in interruption to the service, no reduction from the exchange service charge shall be made unless the same shall have continued for a period of more than one week

Change Of Number

The Company reserves the right to change at any time, any telephone number to meet service requirements.

Directories

The Telephon Directory is published for the convenience of subscribers, but the Company assumes no liability for damages to subscribers for errors or omissions. No change in listings will be made or new listings inserted in the next issue of the Directory, unless the necessary work of making the change of installation involved is completed before the Directory form closes for the printers. The Telephone Directory is issued by and is the property of The Lincoln Telephone & Telegraph Company, and shall be surrendered upon delivery of each later issue. It is copyrighted, and all persons are warned against attaching any unauthorized advertisement, binder, holder, auxiliary cover or attaching any device that will in any way obscure or interfere with any authorized advertisement in the Directory or on the cover.

Default Of Payment Or Other Breach Of Contract

All bills are due when rendered, and are payable at the Company's business office. However, failure to receive a bill will not exempt the subscriber from prompt payment as required by his contract. In event of any default of payment, or other breach of the terms of its service contract, the Company reserves the right to discontinue the subscriber's service or disconnect and remove its telephone equipment.

Information And Transmission Service

The Company assumes no liability for errors which may arise in imparting information. The subscriber assumes all risks for errors and delays in the transmission and delivery over the instruments and lines of the Telephone Company.

Service Connection And Move Charges

The telephone equipment will be placed as near as possible where first directed by the subscriber. If the subscriber orders a change of location of any part of the telephone equipment, a charge will be made in accordance with rules and regulations then in effect.

Telephone Recording Signal

A short high "beep" tone heard on the telephone line about every 15 seconds means that the person with whom you are talking is recording your conversation by means of his recording machine connected to the telephone line.

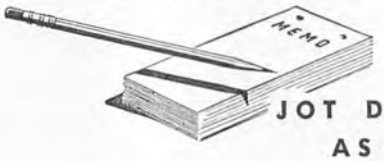
This signal is provided by the Telephone Company for your protection. If you do not want a record made of what you are saying, ask the person with whom you are talking to disconnect the recording machine. When he disconnects his recorder the signal is no longer heard.

The "beep" is produced automatically by the device used to connect the recorder to the telephone line. It stops when the recorder is disconnected. Use of a recorder without this signal is unlawful

Our Policy

It is the constant aim of this Company to furnish a high type of telephone service at the lowest rate permitting of the furnishing of such service. In the rendering of telephone service, the Company considers the interests of its subscribers and of the telephone using public in general as of the utmost importance. It is the Company's desire to keep its subscribers informed continually of its aims, objectives and problems in order that there may be a mutual understanding of these important factors. Constructive suggestions and criticisms offered by subscribers are always welcome.

CALL BY NUMBER FOR FASTER LONG DISTANCE SERVICE



JOT DOWN NEW NUMBERS
AS YOU LEARN THEM

NAME AND TOWN	NUMBER

GIVE DETAILS OF LONG DISTANCE CALLS IN THIS ORDER:

1. The town you are calling.
2. The out-of-town telephone number, if you know it.
3. The name of the person you are calling, or tell the operator you will talk to anyone.
4. The operator will then start your call through. Wait until she asks for your name and number.

"Howdy, Neighbor"

"Hello," "Hi," "Howdy" — are all friendly greetings over your telephone. And they are made possible by the folks who work for your telephone Company. But telephone people do more than provide you with efficient telephone service. Like you, they are friendly neighbors, participating with you in the activities of your community. Whether it's for good telephone service or good citizenship—you can count on telephone people.

OTOE EXCHANGE

ADRIAN M. NEWENS, Area Mgr.

Instructions for operating dial telephones may be found on page 2.

HOW TO DIAL ANOTHER TELEPHONE ON YOUR LINE

(1) If the second and third figures in the number you wish to call are the same as the second and third figures in your own number, the party is on your line. For example, 2454 and 3452 are on the same line.

(2) To call another party on your line, dial the number desired; a busy signal (a buzz-buzz-buzz) will then be heard. Replace your receiver, then the called party's telephone will be rung. Allow sufficient time for the called party to answer, remove your receiver and talk. Should the other party fail to answer, replace the receiver. On a rural line your telephone will ring also. The answer of the called party will stop the ring; you may then remove your receiver, trip the hook latch and talk. If the called telephones do not answer, you may stop the ringing of your bells by removing the receiver, trip the hook latch and replace the receiver.

TO PLACE AN EMERGENCY LINE RING ON RURAL LINES

To place an emergency line ring to all subscribers on your line, dial 3, then the second and third figures of your number, followed by 3. For example, if your number is 2361, you would dial 3-36-3.

Replace your receiver after dialing and all telephones on the line will ring. When ringing stops, remove the receiver, trip the hook latch and talk.

The emergency ring is 5 short rings.

You may also place an emergency line ring by dialing "0" and request the operator to make your announcement.

HOW TO DIAL ANOTHER TELEPHONE ON YOUR LINE

(1) If the second and third figures in the number you wish to call are the same as the second and third figures in your own number, the party is on your line. For example: 4221 and 5224 are on the same party line.

(2) To call another party on your line, dial the number desired; a busy signal (a rapid buzz-buzz-buzz) will then be heard. Replace your receiver, then the called party's telephone will be rung. The bells on your telephone will ring also. The answer of the called party will stop the ring; you may then remove your receiver and talk.

HOW TO DIAL AN EMERGENCY LINE RING ON RURAL LINES

To place an emergency line ring, dial 4, then the second and third figures of your number if you are placing a call on your line; or the second and third figures of the other number if you are placing a call on another line, followed by 3. For example, if you were calling 3220, you would dial 4-22-3.

When placing an emergency line ring on your line, it is necessary that you replace your receiver on the hook immediately after dialing to permit the bells of telephones on your line to ring. When ringing stops, remove the receiver and talk.

When placing a call on other lines, do not hang up after dialing. To do so will break the connection.

The emergency ring is 5 short rings.

You may also place an emergency line ring by dialing "0" and request the operator to make your announcement.

LOOK

IN THE BOOK FIRST IT SAVES TIME!

Whenever you're not sure about a telephone number, don't make time-wasting guesses. Look it up in the telephone directory. You'll be sure to get the party you want . . . the first time you call. It takes only seconds . . . but it can save you many minutes and needless annoyance.

HOW TO DIAL ANOTHER TELEPHONE ON YOUR LINE

(1) If the second and third figures in the number you wish to call are the same as the second and third figures in your own number, the party is on your line. For example: 4221 and 5224 are on the same party line.

(2) To call another party on your line, dial the number desired; a busy signal (a rapid buzz-buzz-buzz) will then be heard. Replace your receiver, then the called party's telephone will be rung. The bells on your telephone will ring also. The answer of the called party will stop the ring; you may then remove your receiver and talk.

HOW TO DIAL AN EMERGENCY LINE RING ON RURAL LINES

To place an emergency line ring, dial 5, then the second and third figures of your number if you are placing a call on your line; or the second and third figures of the other number if you are placing a call on another line, followed by 3. For example, if you were calling 3220, you would dial 5-22-3.

When placing an emergency line ring on your line, it is necessary that you replace your receiver on the hook immediately after dialing to permit the bells of telephones on your line to ring. When ringing stops, remove the receiver and talk.

When placing a call on other lines, do not hang up after dialing. To do so will break the connection.

The emergency ring is 5 short rings.

You may also place an emergency line ring by dialing "0" and request the operator to make your announcement.

HOW TO DIAL ANOTHER TELEPHONE ON YOUR LINE

(1) If the second and third figures in the number you wish to call are the same as the second and third figures in your own number, the party is on your line. For example: 4221 and 5224 are on the same party line.

(2) To call another party on your line, dial the number desired; a busy signal (a rapid buzz-buzz-buzz) will then be heard. Replace your receiver, then the called party's telephone will be rung. The bells on your telephone will ring also. The answer of the called party will stop the ring; you may then remove your receiver and talk.

HOW TO DIAL AN EMERGENCY LINE RING ON RURAL LINES

To place an emergency line ring, dial 3, then the second and third figures of your number if you are placing a call on your line; or the second and third figures of the other number if you are placing a call on another line, followed by 3. For example, if you were calling 3220, you would dial 3-22-3.

When placing an emergency line ring on your line, it is necessary that you replace your receiver on the hook immediately after dialing to permit the bells of telephones on your line to ring. When ringing stops, remove the receiver and talk.

When placing a call on other lines, do not hang up after dialing. To do so will break the connection.

The emergency ring is 5 short rings.

You may also place an emergency line ring by dialing "0" and request the operator to make your announcement.

Union Rendering Co.

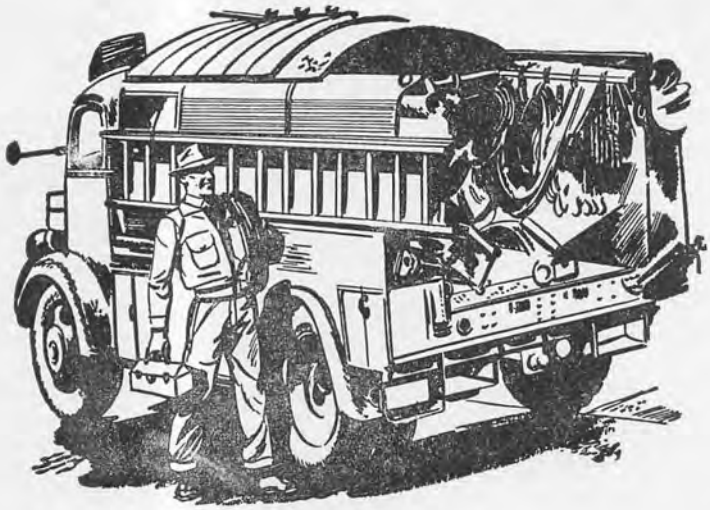
LA PLATTE, NEBR.

An Emergency?

I'll hang up immediately!

In any emergency—be it illness, accident or fire—a good party line neighbor always gives up the line quickly, graciously. And by helping others, you assure the same consideration for yourself.

Remember, when everyone co-operates, everyone receives better service.



WORKSHOP ON WHEELS

Telephone trucks now cost twice as much as 10 years ago. But they are mighty important to good telephone service.

One 2½ ton construction truck similar to the one pictured here costs nearly $9,000 today—double the 1942 price. Equipment in the truck is 80% higher.

These "workshops on wheels" are typical examples of the ever mounting costs of furnishing telephone service—costs that are going up much faster than the rates our customers pay for the service.

Get Acquainted
With Nebraska City

THROUGH THE PAGES
OF YOUR CLASSIFIED
TELEPHONE DIRECTORY

Many newcomers to Nebraska City are finding the classified pages of the classified telephone directory most helpful in solving their numerous shopping problems.

They find the yellow pages to be a handy and reliable reference in selecting the cleaner, the radio shop, the automobile dealer and the many others whose services are so essential to the smooth management of the household. They are valuable too in emergencies and in locating neighborhood dealers and trade marked goods.

Learn to use the classified pages regularly. You'll be pleased with their convenient arrangement and helpful information.
